Dr. Kunjappu’s new book “LINKS AND CONNECTIVITY: From Blog To Book,” has been published recently.

LINKS AND CONNECTIVITY: FROM BLOG TO BOOK is a collection of essays that originally appeared as a blog. Dr. Joy T. Kunjappu, D.Sc., Ph.D., an Indian-American educator/consultant-scientist, lives in New York City. He served as a professor of chemistry, teaching in academic institutions in New York City (Columbia University, Yeshiva University, and Brooklyn College of the City University of New York). Author of two science books and more than 100

scientific and technical articles, he has published three poetry books in Malayalam and one in English — A SOJOURNER'S RHAPSODIES IN ALPHABETICAL ORDER.

Portraying contemporary and universal themes that envelop the infinite and unique perimeters of sociological, anthropological, and scientific arenas, these essays highlight with an insightful, scientific but compassionate approach, the enigmas and dilemmas in which a thinking modern man puddles through. The tone of these essays is analytical, and their texture opens up avenues for discretionary opinion formation, as the author does not impose his views on the readers, rather acts as a homogenizer of ideas in the melting pot of truth, justice, and freedom.

Two versions of the book are available through amazon.com — a print form and an e-Book, which can be viewed through the links shown below.

(a) The Kindle Edition that allows you to browse the first chapter in the book.

Readers' Views:

Links and Connectivity

By [Dr.Sasi](#) on June 16, 2013

Dr.Kunjappus' essay book, "Links and Connectivity: From Blog to Book," covers a wide variety of topics encumbered with provoking ideas and sensibly sequenced subject matter. In these randomly composed essays Prof. Kunjappu has written 14 essays, which have been written after extensive arrangement and notion. The mode of each essay is stimulating readers to modernize their way of

thinking on every subject. He openly discussed almost every subject like anthropology, biology, chemistry, economics, information and technology, philosophy, politics, psychology, religion and scientific literature. The very environment of literature has altered in this fashionable world as almost fifty two percent of American living depends on science and technology. Each essay is the result of ample research in each topic. The language used is really educative, pleasant and instructive! It's primary aim is to convince the reader to judge what the writer believes. The book is motivating without sacrificing ideas; it is revealing without blurring transparency and is of course an outstandingly good alternative to know more about the swift shifting present-day world!!
